Fantastick hickory Sticks:

Fantastick hickory with double reinforcing and non-slip surface finishing. Drumsticks are sold in Economy sets of 5 pairs.
Drumsticks Fantastick The economy hit were created as reaction to drummers demand of cheaper drumsticks with balbex double surface finishing. Fantastick are made of ungraded hickory where higher weight differences can appear.
Fantastick are newly paired according to weight +-2grams and further sorted according to the resonance of woods. They are packed in original case that was developed specially for this purpose. This original case is protected by industrial design no. 2010-38162.
Fantastick are always sold by five pairs in our generally known Economy sets. Economy set is labeled with model mark on front part.

	BR1H	**Brush -steel- HARD**	Material: **Steel**	38.90 SFR

Floppy Sticks:

Floppy sticks FS1, 2, 3, 4 are assembled of skewers made from Premium hornbeam wood. The skewers are very supple, resilient and extremely durable.

The skewers are very supple, resilient and extremely durable. For the production of the drumstick designated as FS 5 and FS 6 top quality bamboo wood is used. Floppy sticks manufactured from bamboo skewers have excellent rebounding properties and their service life is, in many cases, longer than the life of current skewer drumsticks made of any other material. Bamboo skewers do not break and after a long time of use their ends get shattered and the instrument would sound as if classic wire brushes were used for playing.

Practice drumsticks:

Model made of Premium hornbeam with rubber tip. It is made for practicing on any hard material.

Practice The Practice drumsticks are designed above all for the play practising. With them you may knock on virtually any material or furniture without damaging it and without causing the typical “drum noise” by the sticks. Thanks to a special rubber head ending the Practice sticks will always retain the typical drumstick rebound from the drum. They may also be used on practising pads. Moreover, they have also been tested on bongos, kettledrums and on electronic drum sets. Yet, we may not ignore the main purpose of these sticks: your everyday practising. This is the purpose for which the Practice drumsticks are produced.

As a matter of fact, with these sticks you may “warm up” yourself almost everywhere without disturbing your neighbours seriously. Thus, you may also “let off steam” in your office easily after the working day full of demanding stress.

Attention! The PRACTICE drumsticks are not designed for the playing on percussion sets!
